

Dave Godfrey and Alie (the alien) are proud to announce the start of a new series of [Number Fun Nuggets](#) for children in Key Stage 2 (7-11 years of age).

In the first eight episodes, starting today at 11am, the show works through different multiplication tables.

Each show will help children master their times tables by exploring them through:
story,
visualisation,
songs and
adventures around the house

.... including the building of a 2000-piece toy brick football stadium!

We help children learn their table facts with *understanding*. Then we embed them with challenges to reason and explore their knowledge to a deeper level.

These 25-minute sessions have the same energy and expert mathematical foundations as Dave's popular Number Fun Live sessions for 3-7 year old children.

We hope you'll join us.

Dave and the Number Fun team
