

Brickhouse Primary School Nurture Dog Risk Assessment

The value of having an animal in school is becoming widely recognised as having a positive impact on people's well-being. Studies have shown that the presence of companion animals can lower rates of anxiety creating calmer states of mind. This applies to staff as well as to children. It is accepted that interacting with animals is not appropriate for all children but for some it has the potential to provide many positive benefits.

School has a Shih Tzu, called Molly-Mae, and they are known for their love of all people and a breed that has a coat which creates very little dander to the extent that it is described as hypo-allergenic. Molly-Mae is in school four days per week and children have session time with Molly-Mae as detailed in the school's Nurture Dog Policy. Molly-Mae is classed as a working dog in school, and will be treated as such by all stakeholder, just as any other working dog would be i.e. a Guide Dog. She is a working dog from 8.00am in the morning until 5.30pm when she leaves.

The risk assessment below is a working document and will be reviewed at least annually, or more regularly where appropriate, or if there has been a significant change.

The review will be carried out by the Headteacher and the Site Manager in conjunction with the Safeguarding, Welfare and Pastoral Officer. The risk assessment will be submitted to the Governing Board following review.

Nurture Dog Risk Assessment

Applicable to: The Whole School

Specify: Nurture Dog: Molly-Mae

Assessment Date: April 2024
